

Housing and Infrastructure December 2021 update

Dunsford Parish Council are working with Hastoe, a rural affordable housing association, in looking to deliver an affordable housing scheme in the village. One of the reasons we chose to work with Hastoe is their experience in working on rural schemes and their track record of delivering schemes that are sensitive to the local setting. Another is that they are committed to limiting their impact on the environment. To reaffirm that commitment, Hastoe have developed and launched a New Build Standard which details how each stage of development is managed, the minimum standards expected, and the energy efficiency of their new homes. You can find out more about the Hastoe New Build Standard on Hastoe's website: <https://www.hastoe.com/about-us/building-homes/our-new-build-standard>

On that page you will also find links to the Hastoe Way brochure and a design guidance document, both of which give more information on what goes into a Hastoe scheme and what their commitment is to the Parishes they work in, like Dunsford.

Currently the Project is still trying to secure a suitable site for this development and is exploring options with Landowners and the Planning Authority.
